PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | 2 Months

- Worked on full-stack web development projects involving both frontend and backend development.
- Developed and improved web applications, APIs, backend functionality, and database-driven features.
- Worked on AI and machine learning integration within software applications and explored practical AI-powered solutions.
- Gained hands-on experience in testing, debugging, problem-solving, and end-to-end application development.

Freelance WordPress Developer & SEO Specialist | January 2023 – Present

- Developed and managed WordPress websites for clients across different industries.
- Worked to improve website visibility, search performance, and overall content quality.

SELECTED PROJECTS

AI-Powered Camera Monitoring & Customer Journey System — TLT Restaurant, DHA

- Developed an AI-powered camera monitoring system designed to detect and monitor customers, waiters & food service.
- Implemented customer journey tracking to monitor service activities throughout the customer experience.
- Designed automated alerts for service issues including delayed food or water service and missed customer greetings.
- Implemented behavior monitoring that could flag situations where three waiters remained engaged in conversation for more than 30 seconds.
- Integrated AI-based monitoring into a practical restaurant operations and service-quality solution.

Human Resource Management (HRM) System

- Developed a complete HRM system for company operations, including employee management, attendance, payroll, and administrative functions.
- Implemented role-based access and Super Admin functionality for centralized management.
- Built management workflows and dashboards to support day-to-day HR operations.

School Management Portal

- Developed a comprehensive school management portal for students, teachers, children, and administrators.
- Implemented dedicated dashboards and functionality for different user roles.
- Built core school management and administrative workflows into an end-to-end web-based platform.

AI-Based Long-Term Investment Advisory & Portfolio Optimization System

- Designed an intelligent Python-based system that evaluates user financial profiles and provides personalized long-term investment advisory and portfolio optimization recommendations.

EDUCATION

Bachelor of Science in Computer Science (BSCS) — Capital University of Science and Technology (CUST), Islamabad

2023 – Present | 7th Semester | Expected Graduation: 2027
